

COMPREHENSIVE 14-SECTION THEORETICAL PHYSICS FRAMEWORK

Standard Model & General Relativity vs. Chesnokov's SGDM Theory of Everything

Author: Yuri A. Chesnokov (President of NRAP Russia, Physical-Technical Faculty of DSU 1984)

Official Research Portal: <https://multiverse.asistent-aiart.ru/en/>

1. Comparative Analysis Overview

Systematic 14-section comparative treatise evaluating Einstein field equations, electroweak running couplings, QCD confinement, and dark energy against SGDM exact first-principles derivations.

2. Resolution of Fundamental Paradoxes

Demonstrates complete analytical resolution of the Vacuum Catastrophe (120 orders of magnitude), Hubble Tension (66.8 vs 73.6 km/s/Mpc), Black Hole Information Paradox, and Fine-Structure Constant derivation 137.035999...
